

Stackable Manual Handling Flood Prevention Gate (Aluminium Alloy Type)

Tachibana Engineering (HK) Ltd. supplied floodgates to Hong Kong as early as 2008 to protect electrical switch rooms which have high risk of flooding. All of our floodgates installed have survived Super-Typhoons “Hato” in 2017 and “Mangkhut” in 2018.

Our floodgate is of a manual handling design, it can be installed without use of tools and by one person. With each panel designed to be as light as possible. Constructed with aluminum alloy, each meter of the H200 panels weights as little as 3-4kg.

This product is very suitable for **Shops, Factories, Houses, Underground Parking Lots, Entrances, Subway** and etc...

Our Product
